CLINICAL STYLE

My clinical style draws from a variety of approaches. I find myself most comfortable in the humanistic/ person-centered/existential style of treatment with its emphasis on warmth, compassion, empathy, unconditional positive regard, individual choice, and personal responsibility.

I often draw from other theories in my practice as the situation necessitates. My role in teaching counseling theory at the graduate and undergraduate level and supervising graduate-level interns requires me to have a detailed grasp of a variety of counseling theories and approaches. This knowledge adds to my work with individual students and patients.
